

Department of Biochemistry Fall 2020 Seminar Series

BCHM 5004

Location: Engel 223, Mondays, 4:00 - 5:00 PM

Date	Speaker (Name and Affiliation)	Seminar Title
August 31 (Host: Biswarup Mukhopadhyay)	Dr. Valerie Welborn Department of Chemistry, Virginia Tech Online Presentation	Using electric fields as probes of catalytic activity: the role of dynamics in enzyme catalysis
September 7 (Host:)	Labor day	
September 14 (Host: Chloé Lahondère)	Dr. Aaron Gross Department of Entomology, Virginia Tech Online Presentation	
September 21 (Host:)	First Year Graduate Student Rotation talks Online Presentation	
September 28 (Host: Chevon Thorpe)	Dr. Tonisha Lane, PhD School of Education Virginia Tech Online Presentation	Intersectional Approaches to Supporting Women of Color in STEM
October 5 (Host: Glenda Gillaspay)	Dr. Daniel J. Slade Department of Biochemistry, Virginia Tech In-person	Decoding the Rosetta Stone of Oncomicrobes
October 12 (Host: Clement Vinauger)	Dr. Horacio de la Iglesia Department of Biology University of Washington Online Presentation	Entrainment of Circadian Rhythms: The Duel between Light and Fear
October 19 (Host:)	First Year Graduate Student Rotation talks Online Presentation	
October 26 (Host: Brandon Jutras)	Dr. Rich Marconi Department of Microbiology and Immunology Virginia Commonwealth University	Chimeric epitope based vaccines for tick-borne diseases
November 2 (Host: BcGSA)	Dr. Lou Charkoudian Haverford University Online Presentation	Exploring how nature makes molecules
November 9 (Host:)	Open for online Presentation	
November 16 (Host: Biswarup Mukhopadhyay and Kylie Allen)	Dr. Emily Elizabeth Mevers Department of Chemistry Virginia Tech Online or In-person Presentation	Uncovering Microbial Chemical Warfare
November 23 (Host:)	Thanksgiving Break! No seminar	
November 30 (Host:)	Open for online Presentation	
December 7 (Host:)	Open for online Presentation
